

# AI Proof of Concept Accelerator<sup>APCA</sup>

Jumpstart new AI product development and get a prototype in weeks

## THE APCA PROCESS

The **AI Proof of Concept Accelerator (APCA)** is a streamlined process designed to accelerate the realization of new AI products. The APCA will ignite innovation and validate the viability of your AI business case for a minimal investment of time and cost.

Leveraging our proprietary AI platform, we offer a clear and efficient path to deliver actionable AI-based solutions that address real business challenges and opportunities.

Through the APCA, we will help you uncover fresh insights that shape your AI product vision and deliver a tangible Proof of Concept with research, data analysis, technical architecture, and more — enabled by the best AI tools available to meet your unique business needs.

## WHAT TO EXPECT

## DELIVERABLES

- **Business Case Overview**
- **Technical Specifications and Requirements**
- **Data Analysis, Computations, and Algorithm**
- **Functional Proof of Concept**

## EXPECTED TIMELINE

**Accelerator (APCA): 2 Weeks**

**Outcome:** A complete and functional AI Proof of Concept that tests and validates the feasibility of the business case.
